

Know Your Company's Productivity Score

Productivity Tracker, part of Timus SASE Solution, designed to enable decision-makers

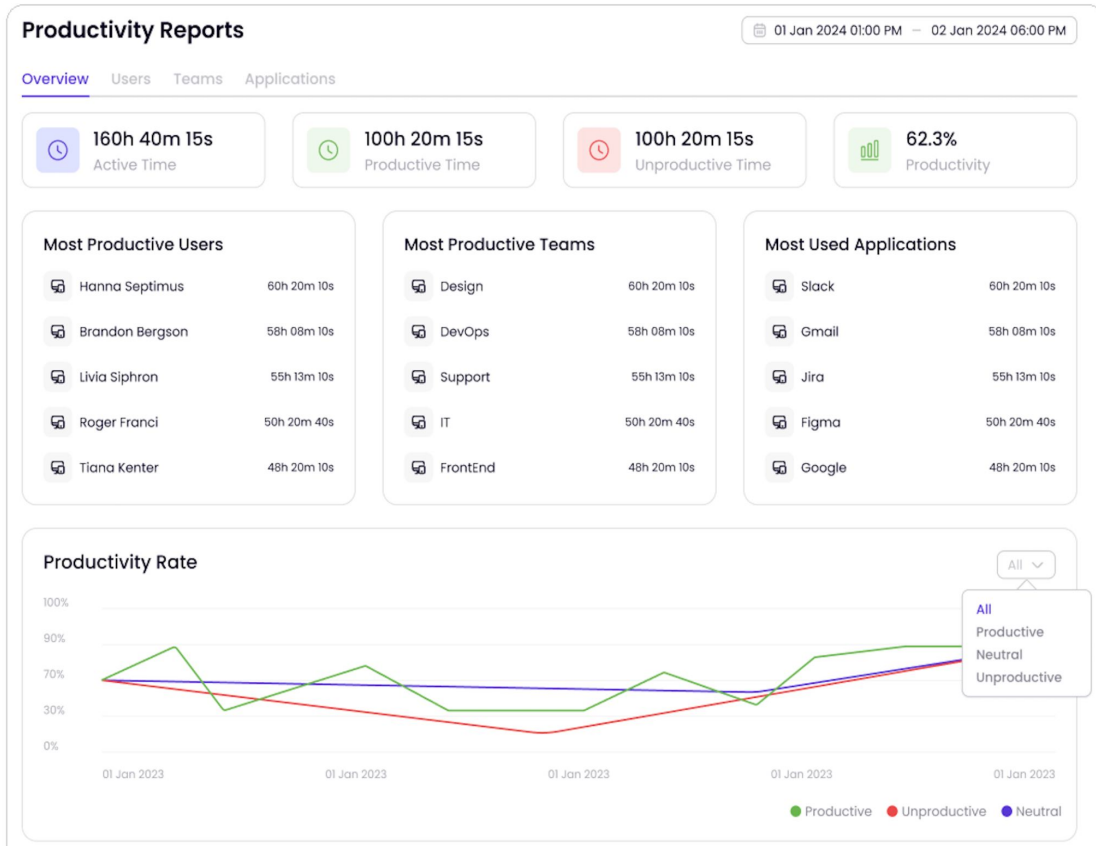

Staff behavior dictates a large percentage of the organization's success

- Labor costs can be up to 70% of total business expenses
- Revenue is directly correlated to staff productivity (sales, marketing, IT, finance, HR)
- Productive activity can be different for each team. Businesses are looking to make data-driven staff decisions

Stay ahead of Key Performance Indicators with Productivity Metrics

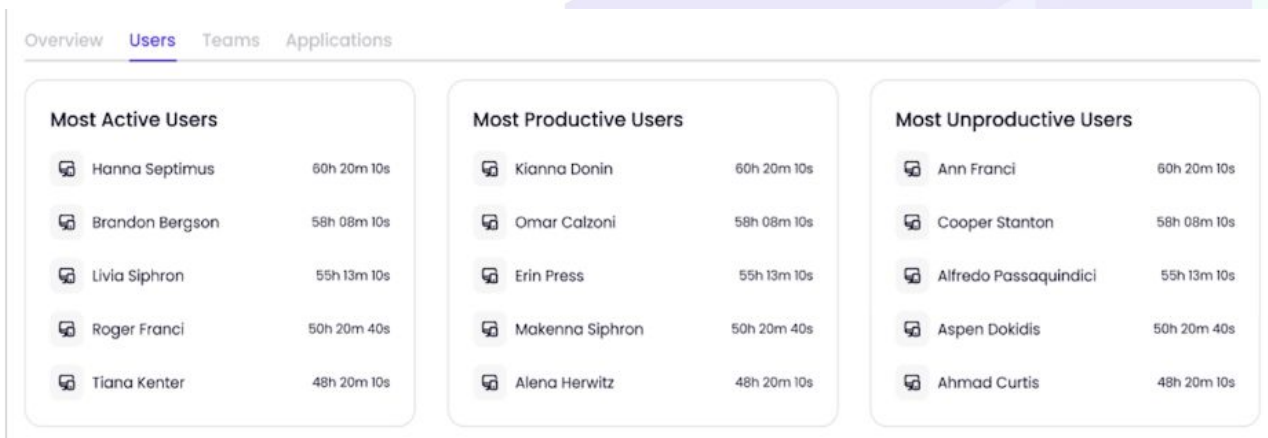

- Company-wide productivity score, broken down by team(s), and user(s)
- Productivity trends over time (daily, weekly, monthly)
- AI-driven productivity segmentation
- Activity metrics for users, teams, websites, and apps

See what matters to you: Automated reporting with high-level and granular productivity insights

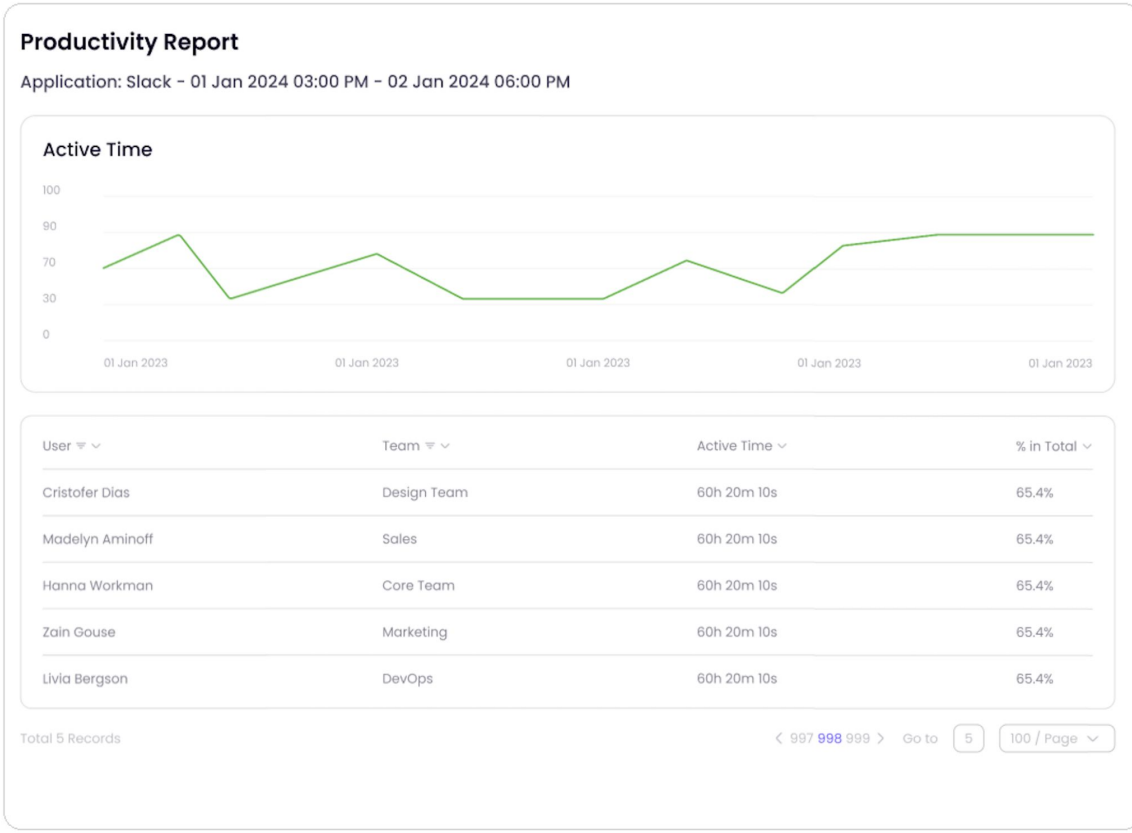

Key Reporting Templates

- Detailed productivity score based on total time worked compared with time spent in productive, unproductive, or neutral sites and applications
- Automated company-wide, team or user specific productivity summary
- Usage overview for all applications
- Productivity trends over a duration of time (daily, weekly, monthly)
- Scorecard rankings showing the top productive & unproductive users and teams

Immediate impact for business owners, department leaders, HR & IT administrators

Functionality & customization tailored to the needs of your business

- Native feature within the Timus Connect app, easy to install
- Minutes to configure
- Predefined or customized categorization of applications
- Application usage tracking can be managed per user
